

Dear travellers,

As you all know #kayakxplore is committed to travel responsibly and sustainably.

Global warming and change of the seasons are delivering to us summers very hot and milder winters.

Too often the best time to travel, in terms of seasons, is actually the worse and we know this because of our experience on the field.

We have indeed divided our plans for the next season offering new smart departures and off season itineraries where you and your friends can experience our world heritage environment in direct close contact with the locals and at the same time not having to deal with big crowd and influx of tourists that normally happen in the summertime and the peak seasons.

The Scandinavian people say it very well ‘ there is no bad weather , there is only bad equipment ‘

#Kayakxplore is well known for a top logistics and equipment and we will promise to you that we continue to offer the best available service for traveling off season.

If you feel like joining us for becoming a true local and avoiding the crowd of the summer season please give a thought to our new adventures for 2023.

We are launching a new trip called:

5TOS , Cinque Terre off season. A 9 day hiking and kayaking experience

Dates: November 2022

March 2023

April 2023

November 2023

If you feel attracted to alternative travel outside the usual routes contact us now departures are guaranteed with a minimum of 5 travelers.
